COGELEC,
***French manufacturer of access control
and intercom equipment***

Turnover: €20 million - 99 employees

- > **2000** COGELEC founded as a French SME.
- > **2003** Leader in the access control market *(and it still is today!)*.
- > **2006** Launch of the INTRATONE brand, specialising in intercom and access control systems for shared buildings.
- > **2007** INTRATONE Telecom founded, provider in telephone intercom using mobile networks.
- > **2009** Launch of the first 3G VISIO intercom.
- > **2014** Launch of a unique and comprehensive key management solution: equipment and key management tool, online.
- > **2015** Launch of the first 100% VIDEO intercom solution using Apple and Android mobile phones⁽¹⁾.

COGELEC guarantees

Innovation for EVERYONE!

- > Over 40 patents registered.

Simple and universal, the wireless solution on the telephone network

How does it work?

1 I receive a call.

A visitor contacts me via the intercom. My mobile or landline telephone rings.

2 I see* the person and I answer.

I pick up my landline or mobile phone depending on whether I am at home or out.

3 I open the door.

I open the entrance door by pressing a key on my mobile or landline phone* (e.g. the * key).

EXCLUSIVE

⁽¹⁾ Discover video on iPhone and Android with the "My Intercom Intratone" app

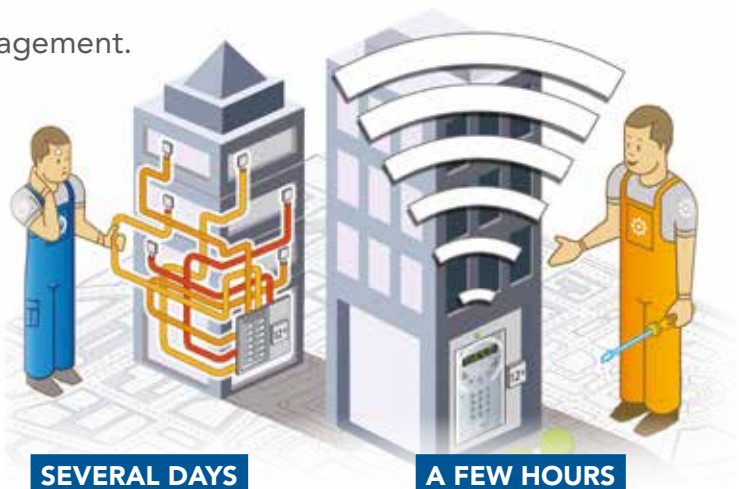

* With 3G Visio compatible mobile phones or all smartphones and tablets with the "My Intercom Intratone" app + the BOXEO package

The advantages of the wireless solution

Quick to set up:
no wiring, no work to be carried out in flats.

Guaranteed savings.

Real-time management.

SEVERAL DAYS

A FEW HOURS

Keeping life simple - control at your fingertips!

Manage and control all site activity from access to intercom panels on all estates using the secure Web platform: **www.intratone.com**

Endless updates on site in real-time to all estates simultaneously.
