

FAST PROGRAMMING (1/2)

Program quickly a lot of keyfobs / remotes by putting them one by one on the programmer.

- | | |
|-----------|---|
| A1 | Click on the <Programming> button on the left bar. |
| A2 | Select the residence and the building where the keyfobs / remotes must be programmed. |
| A3 | Choose the authorization to assign to the keyfobs / remotes which must be programmed. |
| A4 | Show the active apartment and the number of keyfobs / remotes programmed in it. |

FAST PROGRAMMING (2/2)

To program the same number of keyfobs / remotes per apartment:

A5	Define the number of keyfobs / remotes wished per apartment.
A6	Put the keyfobs / remotes one by one on the programmer. The boxes <Num of Keyfobs / Remotes> increase after each programming of keyfobs / remotes. When the number of keyfobs / remotes in the active apartment is reached, the box <Apartment n°X/X> switch automatically to the next apartment.

To program a different number of keyfobs / remotes per apartment :

A5	Do not define a number of keyfobs / remotes per apartment.
A6	Put as many keyfobs / remote as wished in the active apartment.
A7	Click on the <next / previous apartment> to change the active apartment.
A8	Generate a printable document that summarizes the number and the serial number of the keyfobs / remotes per apartment.
